

AFFL TOKEN

White paper

What is AFFL?

AFFL is a virtual social world, the first decentralized metaverse, and the only one that is open source. Within the Decentraland platform, which can run on a browser or desktop client, users can create, experience, and monetize content and applications as well as socialize and attend a wide range of daily, community-driven events. AFFL is unique in that it is owned, created, and governed by the people who use it every day.

AFFL Is a world built by YOU where the only limit is your imagination. Create and sell Wearables & Emotes, construct captivating scenes and interactive experiences, or set up a personal space in your own World.

Driven by the central theme 'Forging Foundations for the Future, AFFL primary focus in 2024 will be the release of a new, powerful Desktop Client capable of supporting the platform's growth and future expansion into VR & mobile.

**Make new friends, explore diverse events,
and spark your creativity in a virtual world
built and owned by its community**

JOIN THE COMMUNITY

As a fully AFFL metaverse, AFFL is owned and governed by its users. Join the AFFL DAO to submit and vote on proposals that affect how the world operates or secure funding for your ideas by applying for grants
